Woodcrete Rail Install Guide

This easy to understand installation information will guide you on your Real-Crete® Woodcrete® Rail Selection

Traditional Post and Rail fences certainly have their place. But when evaluating available options, it is smart to look beyond initial costs to consider ongoing maintenance and replacement expenses.

Featuring durable concrete construction and maintenance-free design, Real-Crete® Woodcrete® Rail has emerged as a popular and versatile alternative for two, three, and four rail, Post and Rail fences.

Post and Rail Dimensions and Weights

Rail Dimensions

- 2405mm x 140mm x 55mm weight 40kgs approx (Used for both 2, 3 and 4 rail fences)

Post Sizes

- 1960mm x 125mm x 140mm weight 70kgs approx (Used for both 2, 3 and 4 rail fences, can be cut to suit required fence height)

Woodcrete® Rail Colour Selection

NATURAL GREY

COCOA

ALEX

Real-Crete® can also complete the installation for you.

Please note; Colours may vary slightly from sleeper to sleeper due to concrete pouring and curing processes. Due to current printing techniques, colours may vary. We recommend looking at real products to fully understand the colour selection before purchasing.

Note that measurements are approximate
